

# MEER END

BESPOKE STAIRCASES & JOINERY

## WELCOME

Meer End Staircases and Joinery Manufacturers have been established for more than 20 years.

But the philosophy behind the way we approach our craft is timeless.

We design and manufacture high quality bespoke staircases and joinery and we undertake a wide range of other specialist joinery commissions. We approach every project as a unique opportunity to create something tailored to the individual customer's needs, taste and budget.

Just as importantly to us, we keep alive a long tradition of English craftsmanship, priding ourselves in delivering top quality products for a fair and honest price.

Our reputation is such that throughout the UK, Europe and as far afield as Barbados people ask for a Meer End staircase by name.

# TOTALLY BESPOKE

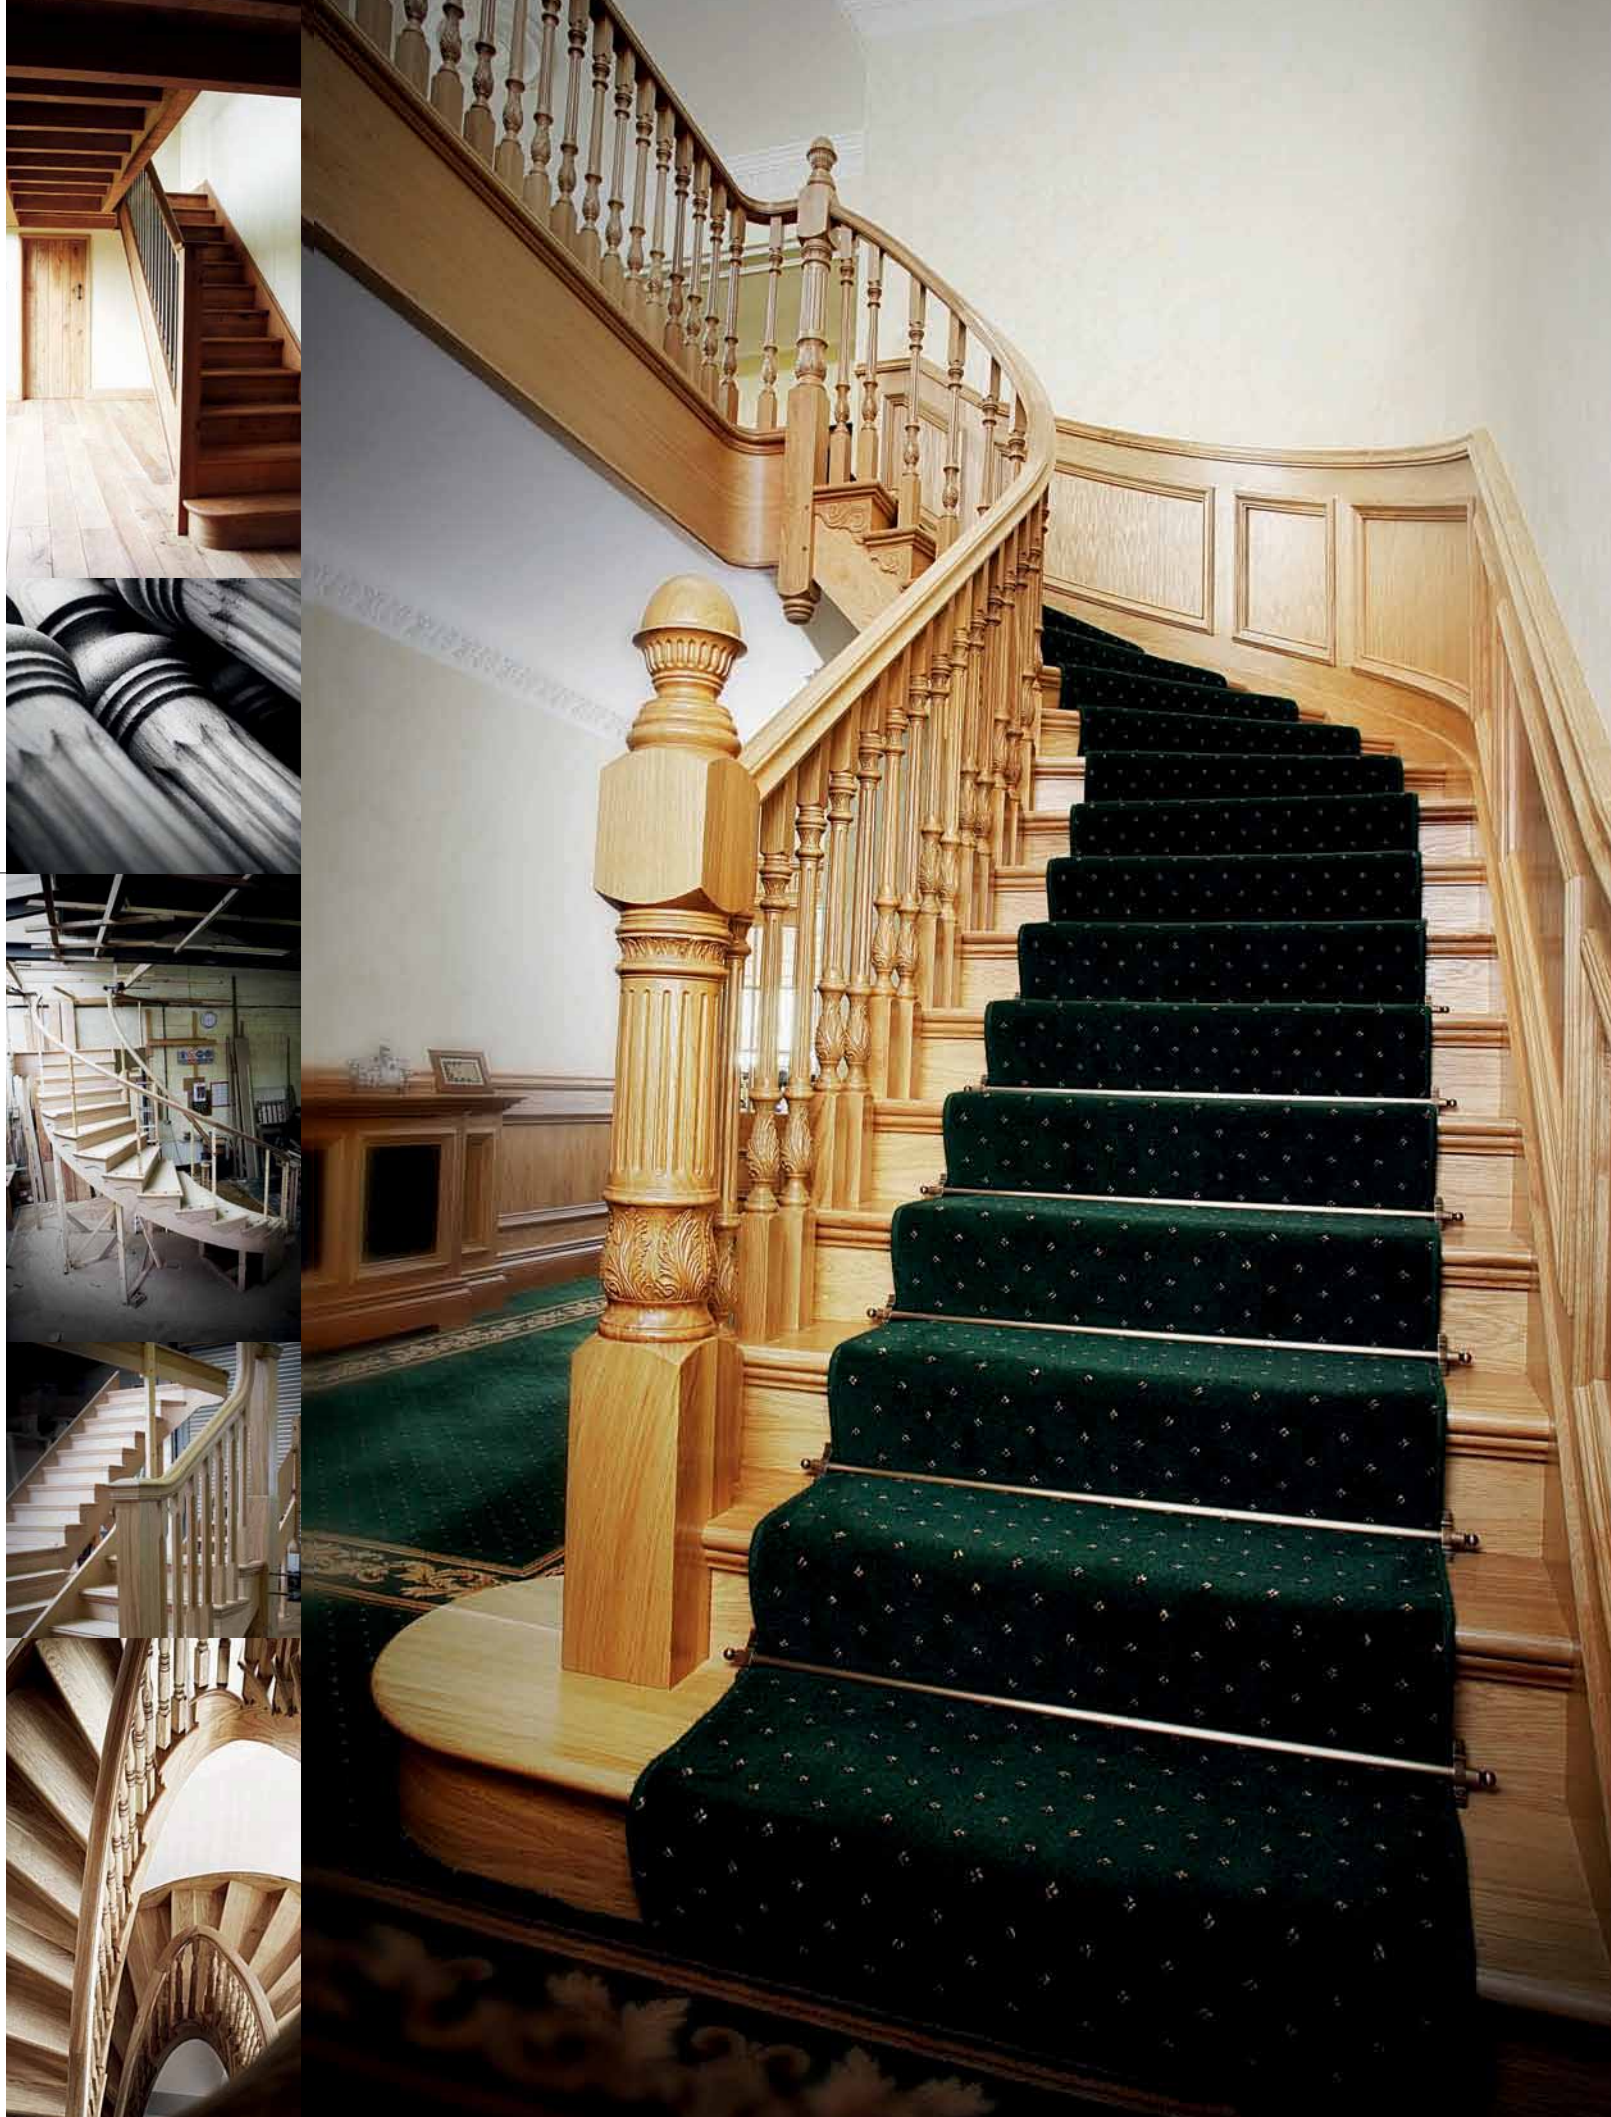

No two Meer End staircases are ever the same.

From our first visit and our conversation about your requirements, a unique project begins to take shape. Drawing on our considerable experience and flair in conjunction with the latest CAD design and drawing technology we design a staircase that is perfect for its environment and a precise reflection of your desires.

We specialise in the design and complete in-house manufacture of curved staircases and balustrading. We can produce one-off designs of balusters and newels inspired by classic staircase architecture to ensure your staircase is unique. We can manufacture exact copies of your existing samples, if that is your requirement. Additionally, we have our own unique range of balustrading components.

Every staircase we create brings lasting elegance and substance to the property it graces.

PULLING OUT ALL THE STOPS

A glimpse at some of the varied and multi faceted Meer End staircase projects. Featured left is a stunning example of a very modern concept, a quarter swan oak dovetailed stair, completely open under, with stainless steel and glass panel balustrading and a continuous oak handrail.

On the right, various types and styles of more traditional staircases, all superbly crafted and detailed.

Traditional, modern, bold or different, all Meer End staircases make an unmistakable statement of true quality.

## BUILDING TODAY'S MASTERPIECES

At Meer End we are more than capable of turning our skills and experience to the creation of innovative, modern designs in glass, stainless steel and other contemporary materials.

We have even pioneered brand new techniques in staircase design.

We were the first people to create a Dovetail Stair, a self-supporting design with no strings or carriages. This brought us enquiries and interest from as far afield as Japan.

And we have crafted dramatic centrepieces to bring truly contemporary spaces to life.

Fine examples of beautiful staircases designed to suit unusual and confined environments.

## DESIGN SOLUTIONS

We truly do not understand 'impossible'.

At times customers come to us after being told by others that their idea won't work. That their concept isn't right, or their dream is unattainable.

At Meer End, we believe 'can't be done' is 'job well done'.

Bring us a problem and we'll approach it positively. A detailed site inspection and survey will show us what we're dealing with. Our considerable experience and knowledge aided by state-of-the-art CAD design and drawing technology enables us to make the most intelligent and aesthetically pleasing use of the environment.

Our experience, expertise and sheer tenacity will deliver the best solution.

## THE FINEST MATERIALS

To ensure a perfect finish of lasting quality and beauty, we work only with the finest materials.

We use prime quality, kiln-dried hardwoods including English and European Oak, Mahogany, American Cherry, American Black Walnut, Maple and European Ash. Other species are available, subject to suitability.

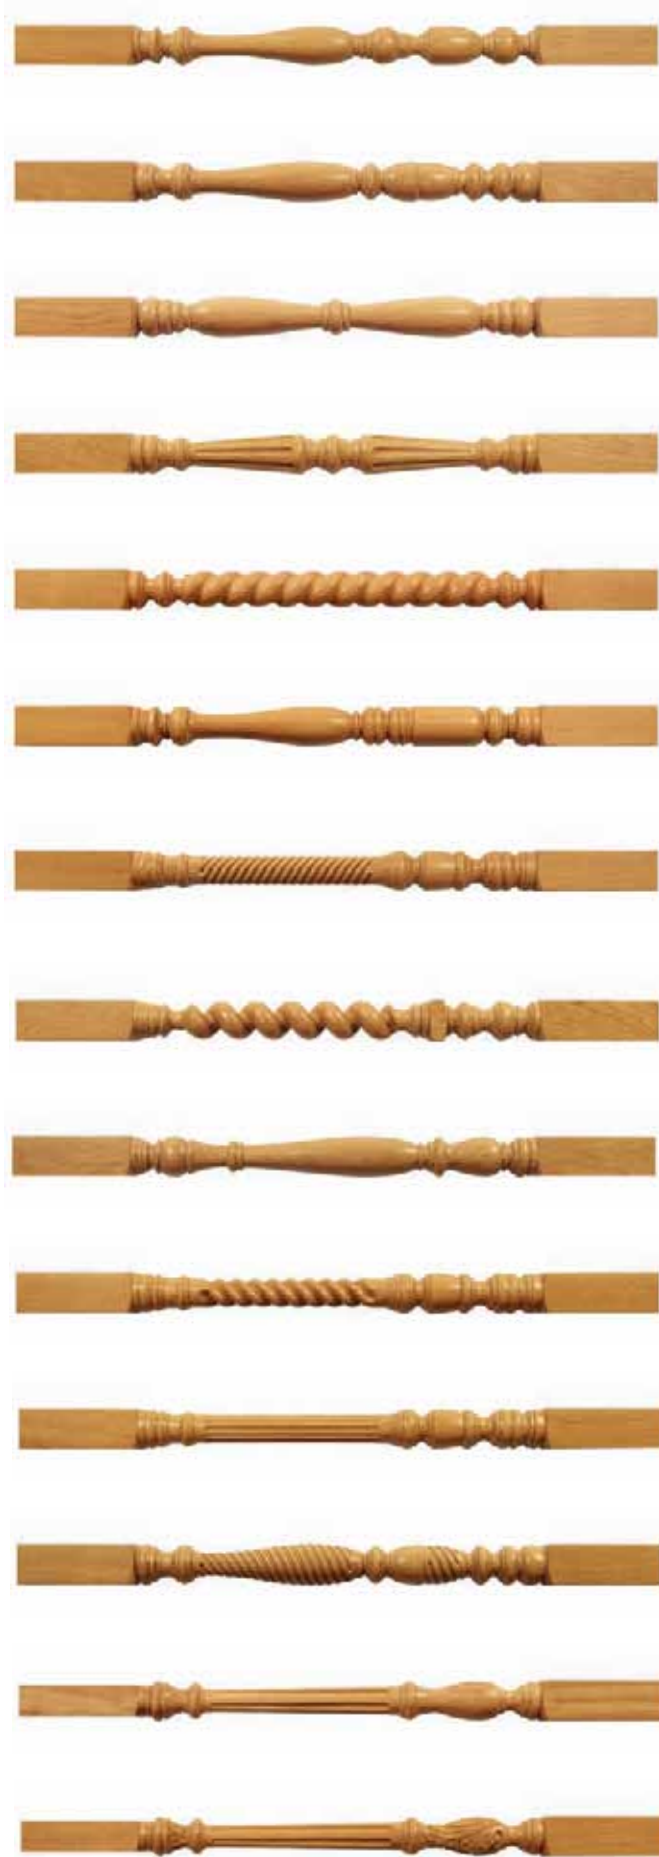

We also manufacture in materials suitable for a painted finish, usually Poplar (Tulipwood). At Meer End we have our own facilities to pre-finish our products – natural, stained or painted.

In all cases, our timber is exclusively selected from regions that actively promote the regeneration of forests and woodland. We make this promise not only out of a concern and respect for the environment, but also out of a desire to protect the continuation of our craft.

Our highly skilled staff are also trained to work with modern materials such as glass, stainless steel and leather in order to achieve the finest possible finish in more contemporary designs.

## MAKING AN ENTRANCE

## MAKING AN ENTRANCE

Meer End Staircases & Joinery Manufacturers has been established for more than 20 years.

We are known globally for our high quality bespoke staircases but we also design and manufacture the finest doors, both internal and external, for some of the most prestigious properties.

Made to exacting standards, we interpret our clients dreams and aspirations to create totally unique entrances that complement and enhance the finished building to provide a memorable first impression.

Our designers will listen carefully to your requirements and, utilising their unique expertise both aesthetically and technically we will create the finest quality doors.

We also specialise of the manufacture of bi-folding doors using track, hinge and locking systems. All our doors are fitted with the latest multi-point locking espagnolettes.

We pride ourselves on keeping alive a long tradition of English craftsmanship, delivering top quality products at a fair and honest price.

Our reputation is such that around the world people now ask for Meer End doors by name.

## ULTIMATE WINDOW TECHNOLOGY

Meer End Staircases & Joinery Manufacturers has been established for more than 20 years.

We are known globally for our high quality bespoke staircases but we also design and manufacture the finest quality windows for some of the most prestigious properties.

Our hardwood timber windows are made from responsibly sourced renewable supplies.

We have developed a range of windows that are designed to provide an aesthetically pleasing appearance combined with ultra-high standards of installation and weather protection.

We pride ourselves on keeping alive a long tradition of English craftsmanship, delivering top quality products at a fair and honest price.

Our reputation is such that around the world people now ask for Meer End by name.

THE GOLD STANDARD IN WINDOWS

ULTIMATE SPECIFICATION & PERFORMANCE

All windows are finished in an environmentally friendly water-based micro porous finish. These coatings use resin systems which, when dry, are both flexible and breathable allowing timber to move naturally through the seasons whilst minimising the cracking and peeling associated with solvent based coatings.

We offer a full range of RAL, British Standard and NCIS colours

TRADITIONAL STYLE

STORM PROOF STYLE

SLIDING SACH STYLE

PRODUCT RANGE

Our Traditional Style and Stormproof windows are constructed in standard section frames which are 95mm x 68mm with a 19mm ovlo, or heavy section frames which are 140mm x 68mm with a 19mm ovlo. Both Traditional and Stormproof style have a casement size of 68mm x 58mm.

All windows have stainless steel, multi-point locking espagnolettes. The reverse action operation pulls the cams together, clamping them to both sides of the striker plate for strength and security.

All our windows are fitted with stainless steel friction hinges. The stay combines emergency egress with an easy-clean facility. It offers improved security and weather sealing through the use of a colour-coded, handed, nylon end-cap and has been designed to offer smooth closure and high performance.

Two different draft seals are fitted to each window (one acoustic and one weather seal) made from high quality rubber.

All windows are double glazed and fitted with Argon gas or Crypton gas to provide additional U value. The windows are beaded internally for improved weather protection (no external pin-holes that allow weather to penetrate) and security.

Internal blind systems can be fitted within the double glazed void in a range of colours.

All windows are fitted with high quality brass or chrome casement fasteners, or customers own fasteners can be fitted.

Only responsibly sourced FSC approved hardwoods are used including oak for a natural finish.
