

MEER END
BESPOKE STAIRCASES & JOINERY

WELCOME

Meer End Staircases and Joinery Manufacturers have been established for more than 20 years.

But the philosophy behind the way we approach our craft is timeless.

We design and manufacture high quality bespoke staircases and joinery and we undertake a wide range of other specialist joinery commissions. We approach every project as a unique opportunity to create something tailored to the individual customer's needs, taste and budget.

Just as importantly to us, we keep alive a long tradition of English craftsmanship, priding ourselves in delivering top quality products for a fair and honest price.

Our reputation is such that throughout the UK, Europe and as far afield as Barbados people ask for a Meer End staircase by name.

TOTALLY BESPOKE

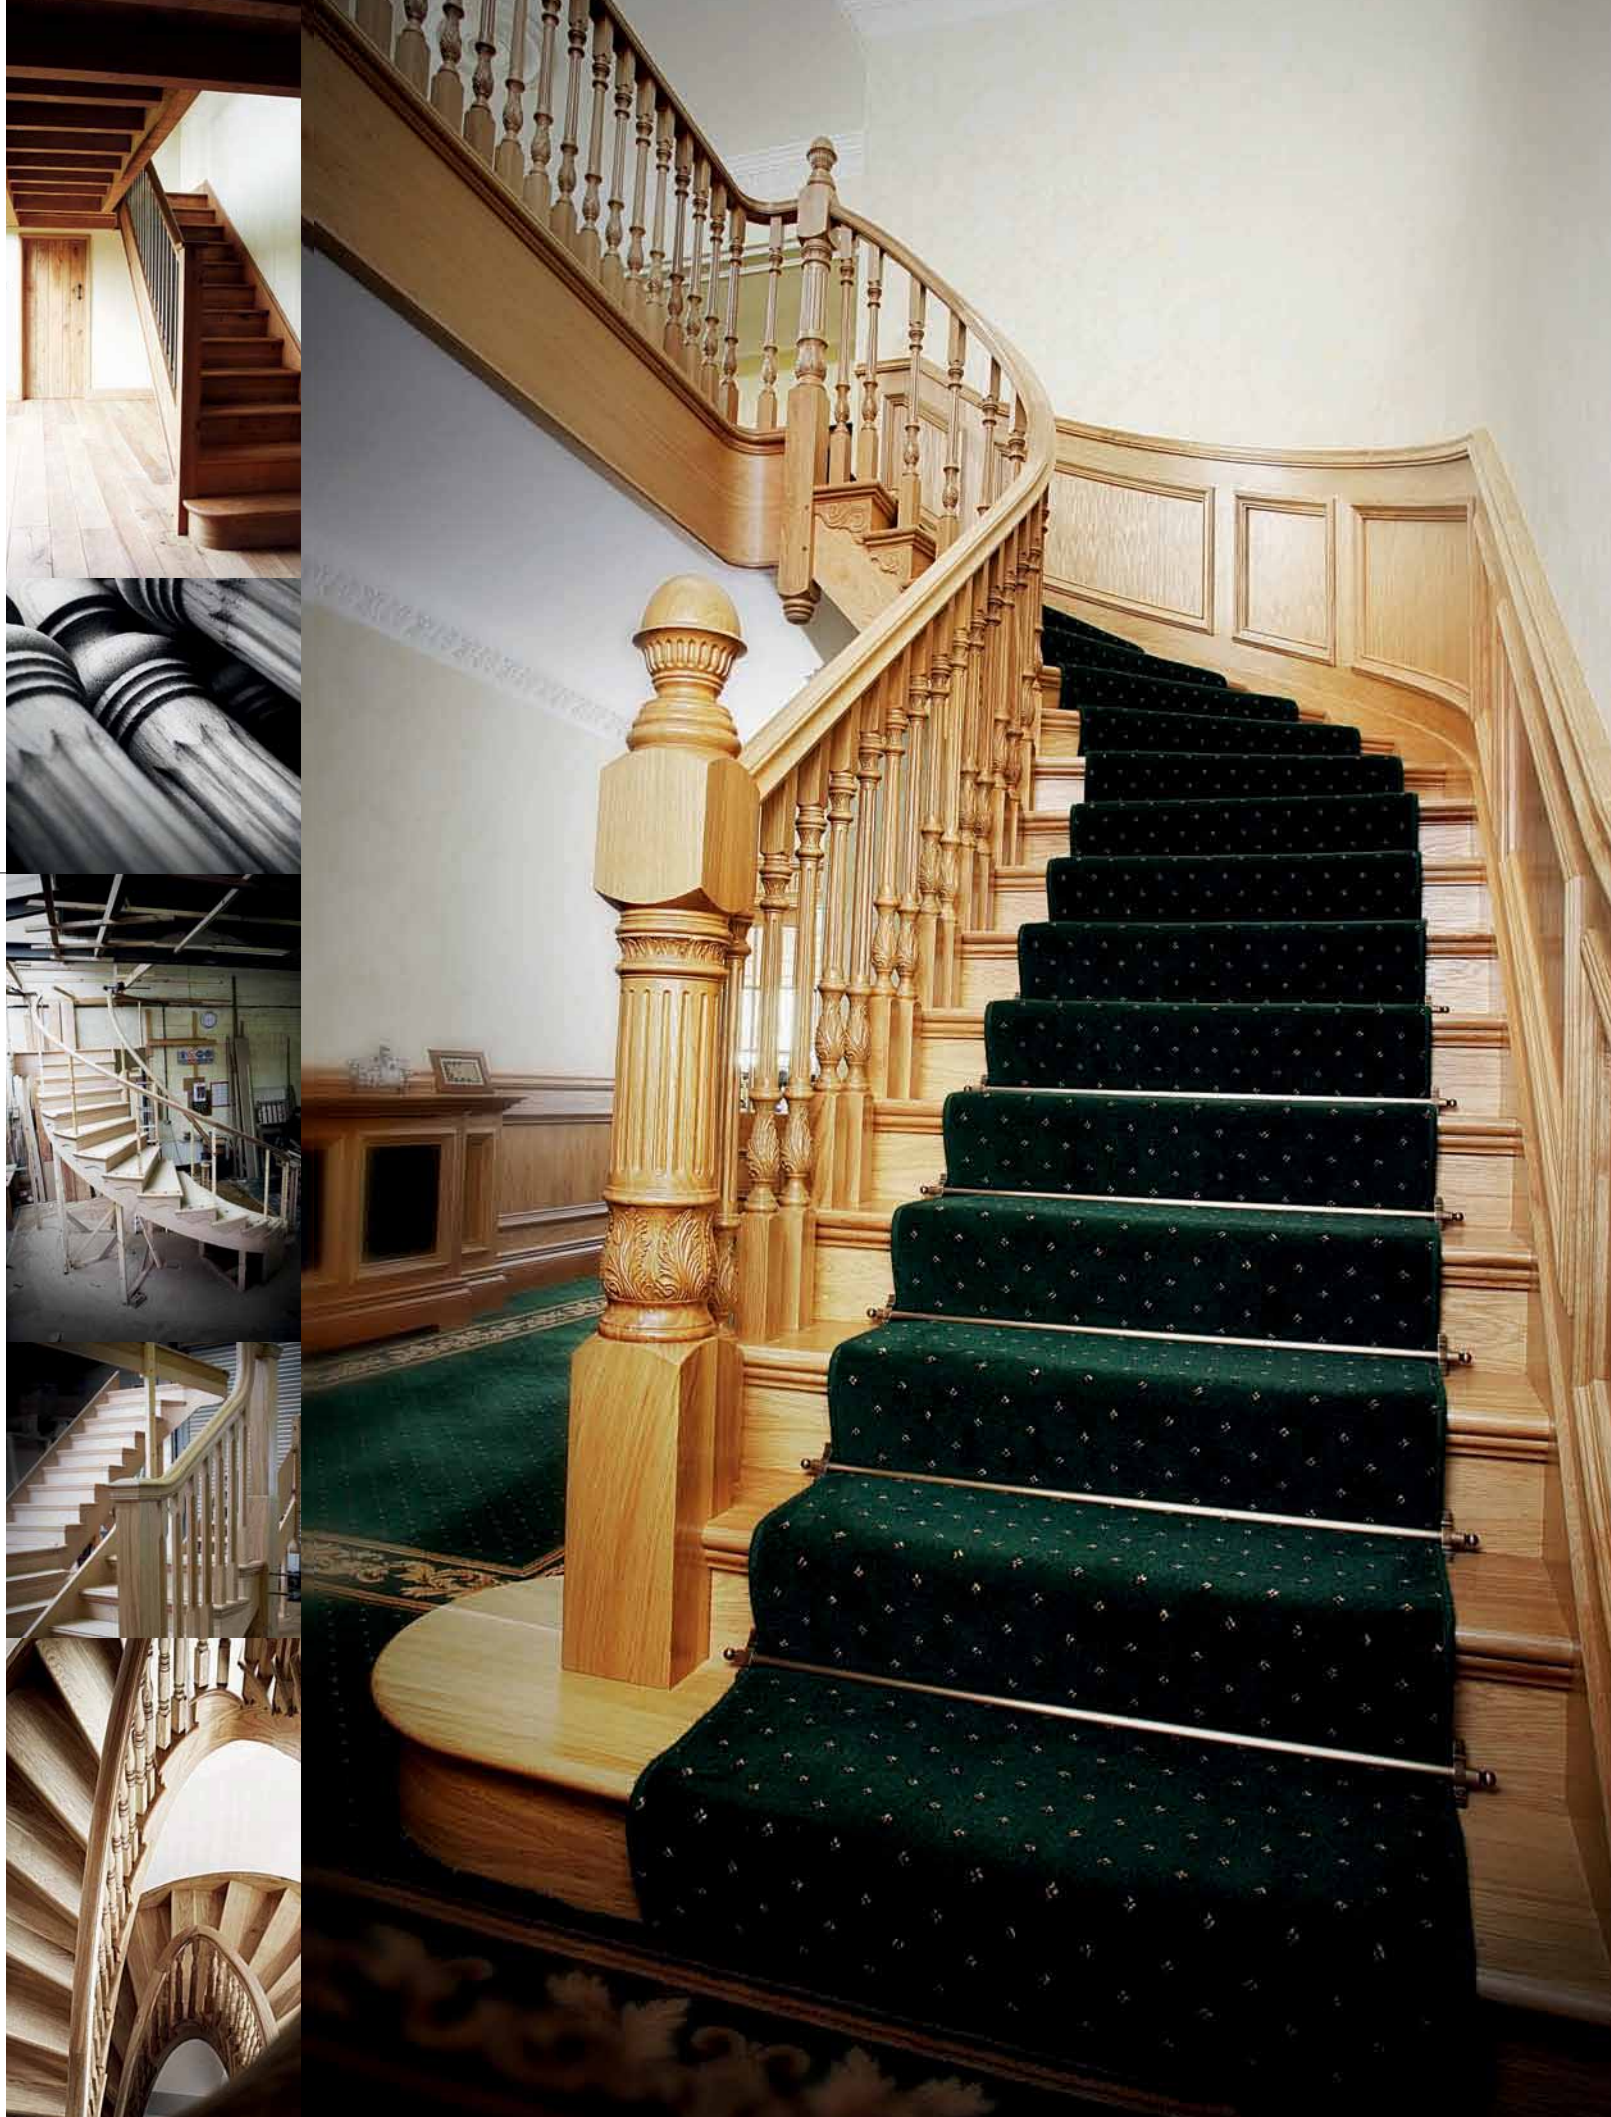

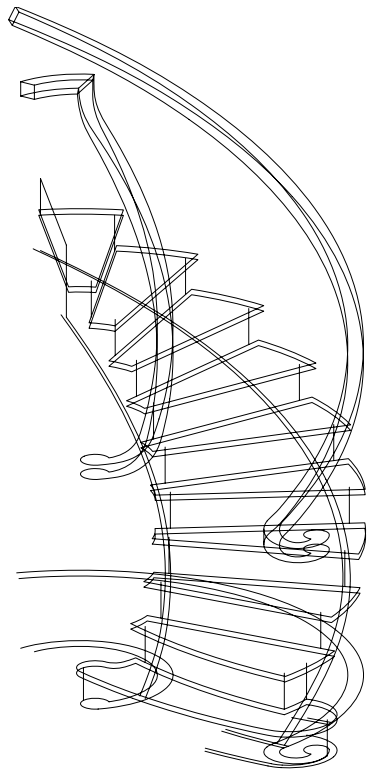

No two Meer End staircases are ever the same.

From our first visit and our conversation about your requirements, a unique project begins to take shape. Drawing on our considerable experience and flair in conjunction with the latest CAD design and drawing technology we design a staircase that is perfect for its environment and a precise reflection of your desires.

We specialise in the design and complete in-house manufacture of curved staircases and balustrading. We can produce one-off designs of balusters and newels inspired by classic staircase architecture to ensure your staircase is unique. We can manufacture exact copies of your existing samples, if that is your requirement. Additionally, we have our own unique range of balustrading components.

Every staircase we create brings lasting elegance and substance to the property it graces.

PULLING OUT ALL THE STOPS

A glimpse at some of the varied and multi faceted Meer End staircase projects. Featured left is a stunning example of a very modern concept, a quarter swan oak dovetailed stair, completely open under, with stainless steel and glass panel balustrading and a continuous oak handrail.

On the right, various types and styles of more traditional staircases, all superbly crafted and detailed.

Traditional, modern, bold or different, all Meer End staircases make an unmistakable statement of true quality.

BUILDING TODAY'S MASTERPIECES

At Meer End we are more than capable of turning our skills and experience to the creation of innovative, modern designs in glass, stainless steel and other contemporary materials.

We have even pioneered brand new techniques in staircase design.

We were the first people to create a Dovetail Stair, a self-supporting design with no strings or carriages. This brought us enquiries and interest from as far afield as Japan.

And we have crafted dramatic centrepieces to bring truly contemporary spaces to life.

Fine examples of beautiful staircases designed to suit unusual and confined environments.

DESIGN SOLUTIONS

We truly do not understand 'impossible'.

At times customers come to us after being told by others that their idea won't work. That their concept isn't right, or their dream is unattainable.

At Meer End, we believe 'can't be done' is 'job well done'.

Bring us a problem and we'll approach it positively. A detailed site inspection and survey will show us what we're dealing with. Our considerable experience and knowledge aided by state-of-the-art CAD design and drawing technology enables us to make the most intelligent and aesthetically pleasing use of the environment.

Our experience, expertise and sheer tenacity will deliver the best solution.

THE FINEST MATERIALS

To ensure a perfect finish of lasting quality and beauty, we work only with the finest materials.

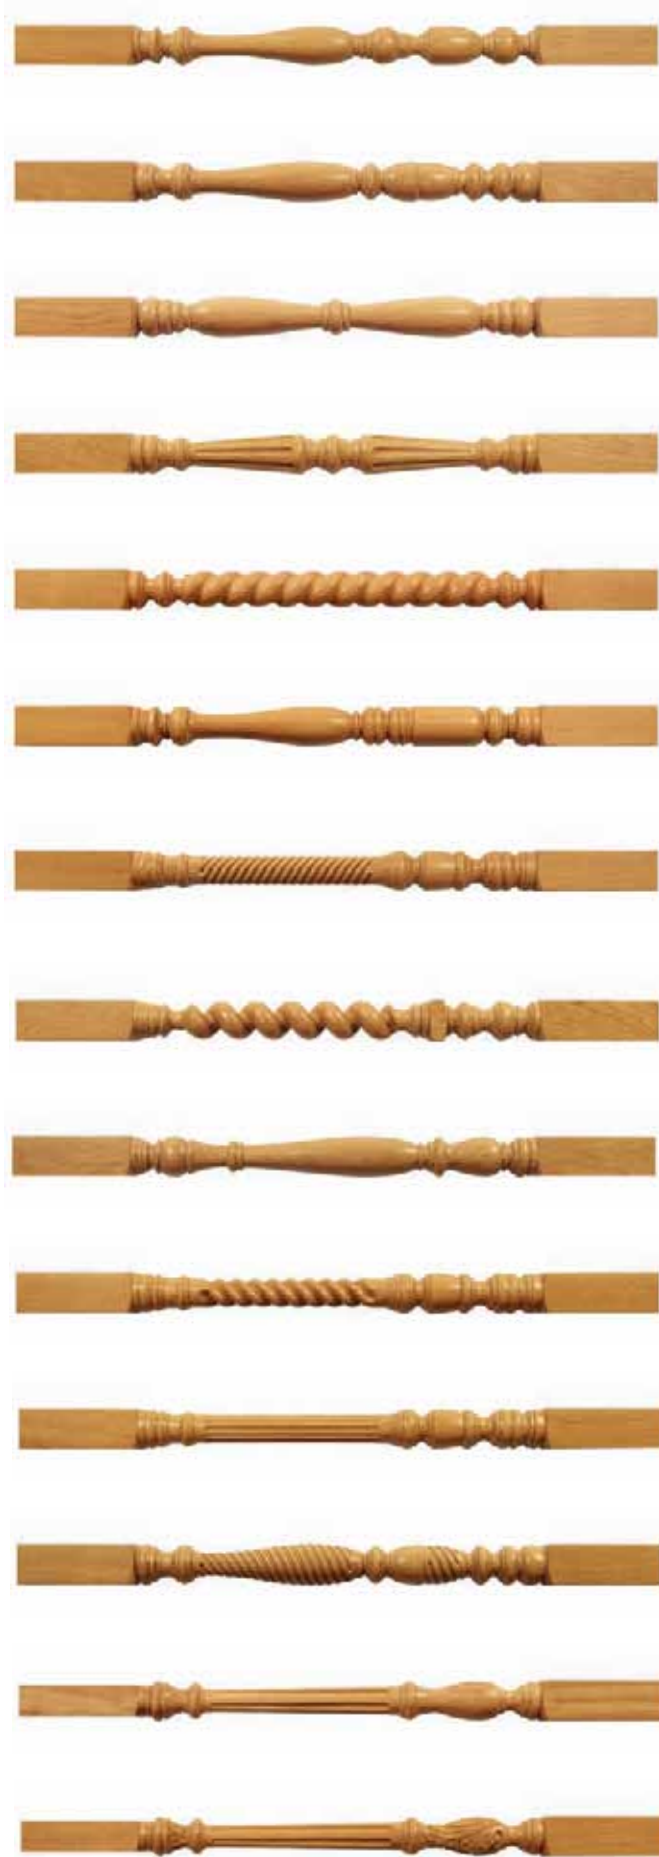

We use prime quality, kiln-dried hardwoods including English and European Oak, Mahogany, American Cherry, American Black Walnut, Maple and European Ash. Other species are available, subject to suitability.

We also manufacture in materials suitable for a painted finish, usually Poplar (Tulipwood). At Meer End we have our own facilities to pre-finish our products – natural, stained or painted.

In all cases, our timber is exclusively selected from regions that actively promote the regeneration of forests and woodland. We make this promise not only out of a concern and respect for the environment, but also out of a desire to protect the continuation of our craft.

Our highly skilled staff are also trained to work with modern materials such as glass, stainless steel and leather in order to achieve the finest possible finish in more contemporary designs.
